Projects

SWFS – Sterling Workforce System

- SWFS is a combined HRIS and Payroll System proposed as a replacement for the old, existing payroll and HRIS systems.
- SWFS is built using modern technologies and programming languages to enhance user experience, optimize performance, and deliver comprehensive and complex data reports.
- SWFS is poised to deliver enhanced productivity, more accurate reporting, and a smoother workflow for the organization.

ESS-PORTAL – Employee Self Service Portal

- ESS Portal is a proposed replacement for the old existing timekeeping filing system.
- The ESS Portal, built using modern technologies, aims to offer an interactive user interface and streamline the process of filing and approving of leave, overtime, under time, and other requests.
- ESS Portal is likely to result in more efficient HR operations, better time management, and an overall increase in productivity within the organization.

SPOTT – Sterling Paper Online Time Tracking

- SPOTT is a proposed mobile application designed to track the attendance of field personnel and roving employees who move between different locations.
- SPOTT aims to provide fast and efficient attendance tracking during timekeeping, helping timekeepers simplify their processes.
- Built using Ionic-Vue framework
